FALL OF 1896.

Reid's
NURSERIES

POCKET PRICE LIST
OF
EVERYTHING
for the
FRUIT
GROWER.

BRIDGEPORT, OHIO.

Reid's

NURSERIES

TO OUR PATRONS.

WE take pleasure in presenting herewith, our Fall HANDY POCKET PRICE LIST, which we trust will be received with the same appreciation as before. Anyone desiring a full and complete catalogue can have the same on application.

We have many thanks to offer our generous patrons and friends for their liberal patronage, testimonials, etc., and can assure them they are duly appreciated, with a promise to do better in future if possible. We are much pleased to state that the season this year has been exceptionally fine for the growth of all nursery stock; ours being unusually good and making prices to correspond with the times, gives all desirous of planting this Fall an opportunity of doing so at the lowest possible rates, combined with one of the finest stocks of both fruit and Ornamental in the Country. We guarantee all our stock to be entirely free from obnoxious insects, root-knot or other diseases. Plant an orchard this Fall, nothing will pay you better.

New customers, we respectfully solicit a trial order, which will convince them that good and reliable stock can be purchased at half rates of the unreliable traveling agent.

Estimates furnished on large orders. We will aim to save you money. Correspondence cordially invited and information cheerfully given to intending purchasers.

NOTICE.—We will be pleased to have our customers look after our interests in their locality. It is well known to all that we do not employ agents. Our trade has been built up by judicious advertising in nothing but the best of the American press; hence, as you will have no one calling on you to represent our stock, we ask all of our customers to get others to club together and make a club order; then you can buy your stock cheaper and save time and freight to all. In buying this way you can save from 50 to 100 per cent. over that of your fraud agent, who sells for high rates and does not give you what you want.

TERMS AND ADVICE.

CASH WITH ORDER. Address all Mail to REID'S NURSERIES, Bridgeport Ohio, we have a special pouch from the Post-Office. Remit by Post-Office or Express Money Order, or Draft on New York or Chicago.

C. O. D. We will send stock in this way, provided one fourth the amount is sent with the order, and the purchaser pays return charges on the money.

ORDER EARLY. You have everything to gain by sending in your order early. Don't delay, as some stock is apt to be exhausted before the season ends.

ESTIMATES will be cheerfully furnished on large orders. In many cases we can quote less than catalogue rates where our stock is in surplus.

OUR PRICES include packing. Orders are delivered free to the forwarders here, when our responsibility ceases. In case of delay, we will do our utmost to expedite delivery.

SHIPPING FACILITIES. No Nursery in the country has better means of transportation than we, as we can reach every point in the land over the following roads and connections: B. & O.; P. C. C. & St. L.; C. & P.; W. & L. E.; C. L. & W. (which is run by the Big Four in connection with the L. S. & M. S.) and the Ohio River Railroad. We can also ship by the Ohio River steamers, which are very handy, and their freight rates are low.

FORMER PRICES are set aside, as this list abrogates all previous prices.

GUARANTY. All our stock is true to name and carefully labeled; yet, while we exercise the greatest care to do this, we will not be held responsible for any sum greater than the cost of stock, and when varieties become exhausted we reserve the right to substitute others of the same class and value, except when orders are marked "No substitution."

PACKING SEASON, We commence packing about the 1st of October, and continue till the ground freezes—usually about the 15th of December.

FRUIT TREES.

W E CALL your special attention to our fine and large stock of Fruit Trees, which is one of the largest and finest to be found in the country. Every care is exercised in growing the stock, to have it the finest that can be had. We would also draw your attention to the fact that our stock is strictly pure. Agents try many times to make buyers believe that because we offer stock so low it is not true to name.

Yet, at the same time, if the purchaser will remember, we are always at the same place, and the agent is not. We would also ask Who pays the agent's expenses. Our business is directly with the grower, and we invite one and all to examine our stock, which is claimed to be the best in the country. We also call your attention to the fact that we are the only nursery that gives the caliper of our stock. Any grade of a tree can be first-class of its grade, but see that you compare our prices, in caliper. Many nurserymen call a 5-8 to 3-4-inch tree first-class. It is of its grade, but it is not what is termed a first-class tree.

FALL PLANTING. Those who contemplate planting trees in the near future will do well to set in the Fall. This is the best time to set all kinds of nursery stock that is hardy and will stand the winter. It is not only the best, but can be done to better advantage than in the spring. The ground is in better condition, you are not so rushed for time, and the work can be more thoroughly done. Still further, a tree set in November will make twice the growth the following summer of one set in April.

There is no necessity for a planter who understands the art of setting to miss a single tree. We recommend Fall as the best time in the year to set trees.

APPLES.

The first fruit, both in importance and general culture, is the Apple. Its period, unlike that of other fruits, extends nearly or quite through the year. By planting judicious selections of summer, autumn and winter sorts, a constant succession can be easily obtained of this fruit, so indispensable for family use. There is no farm crop which on the average will produce one-fourth as much income per acre as will a good Apple orchard. Prices as follows, except where noted. Boxed and baled free. *Thousand rates on application*

PEARS.

The Pear, like most other things highly desirable and valuable, cannot be had without attention, labor and skill. The relative price of the Apple and Pear being about as 1 to 10, shows at the same time the superior value of the latter, and the greater skill required to bring it to perfection. Summer pears should be gathered at least ten days before they are ripe, and autumn Pears at least a fortnight. Winter varieties, if they will hang so long, may be left until the leaves begin to fall.

PEACHES.

The Peach tree requires a well-drained, moderately rich soil—a warm, sandy loam is probably the best. To preserve the continued healthy growth of the trees and the fine quality of the fruit, the trees should have the shoots and branches shortened every year, so as to preserve a round, vigorous head with plenty of young wood; and the land should not be seeded to grass, but kept in constant cultivation in hoed crops. The following are the best among 100 sorts in bearing:

✓ **LORENTZ.** We offer this new peach with pride, knowing personally just what it is, and that we are giving our customers full value for their money. It is among peaches just what Timbrell strawberry is among strawberries—the **best ever offered**. The Lorentz is known to all fruit growers in this section, and when it was known that we had control of the stock, many orders were tendered us before the trees were propagated.

WHAT WE CLAIM FOR LORENTZ: That it is **superior in quality to any other peach that ripens at the same time**; that it is more attractive, showing both bloom and color the same as an early September Peach; that it has not failed to produce a full crop in the five years it has been

Lorentz Peach, Half Natural Size.

PEACHES.—continued.

in existence, while but one crop has been gathered in the same time from other varieties ; wherefore, we believe its blooms to be frost-proof, or so much so that no harm is done Lorentz when other standard varieties are frozen. This season, when all other varieties failed, the Lorentz was loaded with fruit. From one foot of wood, cut for photographing, there were taken 25 Peaches the same size as those sent out; hence it will be seen that it is an abundant yielder. The fruit was not so large this season, because of dry weather and neglect in thinning the over-abundant setting, but will average, as shown in the photo-engraving (see above), as large as Crawford Late, Stump or Wheatland. Lorentz was ready for market October 25; and kept in good shape for two weeks after

PEACHES.—continued.

being picked. It is yellow-fleshed, with a bright red cheek, and a perfect freestone of the best quality.

OPINIONS FROM THE HORTICULTURAL PRESS.

LORENTZ PEACH.—The specimens alluded to came to hand in good condition. The Peaches have a yellow skin, some of them showing considerable red at the blossom end or on one cheek. The variety is of a large medium size, a freestone, yellow-fleshed, and of a quality equal to or excelling the average late Peach. The suture mark shows plainly on one side, and most of them have the peculiar Melocoton tip (Crawford). If it will do as well for others as for Mr. Reid, it should be a valuable addition to the list.

E. S. CARMAN, Editor RURAL NEW YORKER.

We have received from E. W. Reid, the well-known nurseryman of Bridgeport, O., a basket of the Lorentz Peach. They were sampled, and found to be all that was claimed for them, so far as quality was concerned. When Reid says Peaches are good, we are ready to believe it.

PLUMS.

The Plum, like the pear and other finer fruits, attains its greatest perfection on our heavy soil, being entirely free from disease. The curculio, a small, dark brown beetle, often stings the fruit, causing it to drop off; but following directions, faithfully observed, will secure a good crop of this splendid fruit everywhere:

As soon as the blossoms are fallen, spread two sheets under the tree, and give the tree a sudden jar by striking a smart blow with a hammer upon the stub of a limb sawed from the tree for the purpose; the insects will drop on the sheet, and can be killed. Collect all the fallen fruit and burn or feed to swine. Repeat the operation every day for two or three weeks. It should be done before sunrise.

CHERRIES.

The Cherry tree universally requires a dry soil, and is naturally a hardy tree, succeeding in the lightest soil or dryest situations. The Heart and Bigarreau varieties are of rapid growth, with large, glossy leaves, forming fine pyramidal-shaped heads, and producing large crops of luscious fruit; are well adapted for planting along streets, or in yards as shade trees.

NUT TREES.

Nut culture is an industry that until recently has received but little attention. The large returns of 25 to 150 from individual trees, and the immense profits from established orchards, have stimulated the interest, and our foremost enterprising fruit-growers are planting NUT TREES largely for market purposes; and others who enjoy the nuts during winter are realizing that in order to have an abundant supply it is only necessary to plant the trees, as hardy varieties are now grown that succeed in all sections of the United States.

THE TIMBRELL

STRAWBERRIES.

TIMBRELL. (P.) The vine is a vigorous, rank grower, with dark, thick foliage; berry large and symmetrical, dark crimson color, extending through the flesh when fully ripe. Bears abundantly, and being very solid, stands shipment well. We commend this berry to all our patrons as the best late variety in existence, and as sure to become one of the leading standard varieties when its sterling values are known. *Be sure and get the genuine plants.*

ENORMOUS.

This is rightly named so far as we have seen, being the best we saw fruiting in a field of all the standard varieties. Plants are simply immense, and their tremendous root growth makes them independent of a dry season. Berries are large to very large, and were hanging in clusters in matted rows. We confidently believe this to be about the best berry offered for some time, and can fully recommend it to all our progressive berry growers as a bonanza. If you want one of the best new berries, get this. Plants are somewhat limited, so we request our patrons who want to try this berry to send in their orders early.

CHAMPION OF ENGLAND.

This berry was brought from England by an English gardener some years ago, and has been kept and grown by him exclusively for market. He has been able to lead all other growers in sale and price, whatever varieties they might have, getting nearly double the price. The plant is one of the strongest grown, very large and healthy. It has also a perfect blossom, and is medium early. The fruit is immense in size; some have been exhibited that measure six inches in circumference, and 14 berries have been picked from it that filled a quart basket. The berry has a bright, polished surface, and is unusually firm for so large a fruit. The vigor of the plant seems astonishing, and some growing on clay did not suffer at all from the dry, hot weather, but made fully as strong rows as on sand or loam.

LADY THOMPSON.

The berry is beautiful in appearance, with a perfect blossom, and the plant immensely productive. We believe it will rank with the best for a field berry. It is quite a favorite where planted, especially amongst shippers; being so solid, it invariably arrives in good condition and commands the highest market price. It has also a long season of ripening, and brings all the berries to perfection.

TENNESSEE PROLIFIC.

This is a seedling of Crescent and Sharpless, inheriting great productiveness from Crescent and very large size from the Sharpless. No variety has ever before become so widely and quickly popular. The sight of it in fruiting time is all that is needed to convince one of its value. A perfect bloomer, that has had nothing but praise on all sides. Large and productive,

BRANDYWINE.

This is one of the most promising varieties that has been introduced the past season. The berries are large in size and very uniform in shape; color a bright crimson, very prolific, firm, and continues a long time in fruit. Plant is all that could be desired, producing a large, healthy and vigorous growth.

MARSHALL.

This plant is a strong, vigorous and healthy grower, berries dark crimson in color when perfectly ripe; size large to very large, of excellent quality and good for shipping; productive when given good treatment.

SPLENDID. (P.)

This is a healthy luxuriant grower; sends out many runners and bears abundantly; very desirable for home use or market; berries large, fine color and ripens all over. Season medium early.

BISEL. (P.)

This is a seedling of the Wilson, plant a healthy, vigorous grower, and will stand drough well. Fruit is large, luscious and firm; color a deep glossy red and very productive. Season early.

WINEBERRY.

Japanese.....Doz.; 50 cts.; 100, \$1 00

BLACKBERRIES.

ELDORADO.—This is the most valuable blackberry ever put on the market, and is endorsed by the strongest recommendations from the highest authority on new or old fruits.

It has been cultivated 12 years, and under careful test at different experiment stations for four years has never winter-killed or failed to produce a full crop of the finest fruit. The vines are very vigorous and hardy, enduring the winters of the far Northwest without injury, and their yield is enormous. Berries are very large, jet-black, borne in large clusters, and ripen well together; are very sweet, melting, pleasing to the taste, have no hard core, and keep eight or ten days after picking with quality unimpaired.

NOTE.—Thousand rates and mixed lot prices on application.

 Six or more grape-vines of a variety at dozen rates, by mail, postpaid; fifty or more of a kind at one hundred rate; one hundred grape-vines of different kinds, if order amounts to \$5 or over, at one hundred rate. \$10 worth of grape-vines at one hundred rate. Box and packing free.

NOTE.—We have an immense stock of leading varieties. Write us before you buy.

DWARF ROCKY MOUNTAIN CHERRY.

This is an introduction from the West which originally grew wild in the Mountains, but has been much improved by cultivation. It is remarkably hardy, a sure annual bearer and productive, of very easy culture, bearing when two years old. Fruit of good size, good flavor and can be eaten fresh, is also excellent for canning, and is more easily pitted than any other cherry. Very desirable for the kitchen garden.

Price 20 cts. each.
\$2.00 per doz., \$12.00
per 100.

BUFFALO BERRY.

The fruit resembles small currants, but is of richer taste, and literally covers the twigs and branches. If not gathered it will remain on the plants through the winter. Esteemed for pies, tarts, preserves, jellies, etc. The plants are very hardy and easily cultivated, and bear abundant crops of fruit every year. As the male and female blossoms are borne on different plants, they should be planted in clusters of three or more, for best results.

Price 10 cts. each, \$1.00 per doz., \$5.00 per 100.

CYDONIA JAPONICA===Columbia.

(Edible Japan Quince.)

This is a new edible fruit which has been evolved from the Japan Quince. The introducer claims that it is very valuable for culinary purposes and that his entire crop is engaged in advance for making jelly, which is very delicious. Tree is very hardy, healthy, enormously productive and remarkably free from disease or insect pests, it also makes a fine ornamental shrub.

Price 35 cts. each, \$3.50 per doz.

IMPROVED DWARF JUNE BERRY.

A good substitute for the large or swamp huckle berry or whortle berry which it resembles in appearance and quality. The fruit is borne in clusters, and is reddish purple in color, changing to a bluish black. In flavor it is

a mild, rich sub-acid; excellent as a dessert fruit or canned. The bushes are extremely hardy, enduring the cold and the heat of summer without injury. Price 10 cents each, 75 cents per dozen, \$5.00 per 100.

ELEAGNUS LONGPIPES.

This new and valuable acquisition, a native of Japan, is one of our most promising new fruits, and we highly recommend it for more general planting. The bush begins to bear at two years old, and the fruit is very highly prized by those who have fruited it, for its peculiar piquancy, making a very delicious sauce, and considered much superior to the cranberry. Price 15 cents each, \$1 50 per dozen.

A NEW HARDY ORANGE.—(*Citrus Trifoliata*.)

It is a dwarf, of low, symmetrical growth, with beautiful trifoliate, glossy green leaves, and abundance of large, white, sweet-scented blossoms. The fruit is small, bright orange-red in color, having a peculiar flavor; of no value for eating, useful in making a lemonade, as the fruit is as acid as a lime. 15 cents each, \$1 50 per dozen.
